

SYSTEM FOR AND METHOD OF POPULATING A CONTACT LIST ON A PORTABLE DEVICE

ABSTRACT OF THE DISCLOSURE

The system and method herein provide for the populating of a contact list on a portable device. Techniques involved can include monitoring and scanning messages in an email inbox to retrieve display names and simple mail transfer protocol (SMTP) addresses of senders and/or recipients for each email. The system and method can selectively filter information from the emails to populate the contact list with new names and resolve any conflicts with existing names.
